

Gustavo Peralta

AI Software Engineer

gussrw1@gmail.com | github.com/gussrw | linkedin.com/in/gussrw | Aguascalientes, México (open to remote)

AI Software Engineer and Tech Lead with **9+ years** of experience. Expert in building web architectures, developing **multi-agent systems**, and leading **DevOps** operations, from CI/CD automation to cloud infrastructure management.

PROFESSIONAL EXPERIENCE

Escal8

AI Software Engineer

Aug 2024 – Sep 2026

- Accelerated coding and technical problem-solving by integrating **AI assistants** (Claude Code CLI, Google Antigravity) directly into the development workflow.
- Built and maintained the **backend architecture** for core infrastructure and the Moodle ecosystem using PHP, Python, and JavaScript, optimizing system performance and **scalability** in production.
- Developed multi-agent systems and carried out the **full migration** of AI infrastructure from Google Cloud Platform to **AWS Bedrock**.
- **Reduced API consumption costs** and foundation-model latency by limiting context windows, profiling the right model for each task, and refining prompt engineering.
- Automated production releases through **CI/CD pipelines** and managed cloud infrastructure (AWS, Linux), establishing a **DevOps culture** and stricter development practices to prevent system outages.

CCEO Software Development

Chief Technology Officer (CTO)

Jul 2022 – Aug 2024

- Led the company's **technology strategy**, defining the core architecture, evaluating third-party integrations, and driving the adoption of new technologies across multiple concurrent projects.
- Standardized the team's engineering practices by instituting **code reviews**, static analysis tooling (ESLint), and agile planning methodologies, which sped up onboarding of new developers and improved **software quality**.
- Implemented DevOps practices by managing production infrastructure (Linux servers, firewalls, Datadog) and systematized deployments through CI/CD pipelines (GitHub Actions), **eliminating hours of manual work** and drastically reducing release errors.

Full Stack Developer

Sep 2017 – Jul 2022

- Built and maintained end-to-end web platforms, developing **robust back ends** with Laravel (PHP) and relational databases (MySQL/PostgreSQL), and interactive front ends with JavaScript and Vue.js.
- **Optimized overall performance** of production applications by refactoring database queries and designing responsive interfaces focused on improving the end-user experience.
- Translated business requirements into clear technical specifications, taking part in the **full development lifecycle** to reduce rework and ensure on-time delivery.

MyShell Software Lab

CEO & Founder

May 2018 – Present

- Built and maintain an **ecosystem of open-source tools** (including TaskFlow and Vue/Laravel utilities) focused on improving developer experience (DX).
- Manage the project lifecycle on GitHub, defining the technical roadmap, reviewing pull requests (PRs), and **actively resolving issues** reported by the community.
- Facilitated adoption of these tools by writing **clear technical documentation** and designing direct integrations that save other engineers hours of setup, motivated by a commitment to free and collaborative software.

PROJECTS

- **TaskFlow:** Designed an agile product management platform (Next.js, TypeScript, MongoDB, Socket.io). Accelerated the planning cycle by integrating an **AI copilot** (Gemini/Bedrock) that turns requirements into **automated tasks** within dynamic drag-and-drop interfaces.
- **Ajax Laravel Validator:** Built an open-source npm package for Vue.js (**3,000+ annual installs**) that simplifies frontend-backend interaction, integrating client-side validation, reactive object submission, and Laravel FormRequest error handling directly in the UI.
- **BBVA TPV:** Integrated BBVA card terminals into a point-of-sale application built in C# and .NET, supporting sales, refunds, cancellations, reward-point payments, and cash withdrawals.
- **Prefectos:** Replaced manual teacher-attendance tracking at Instituto Tecnológico de Aguascalientes with a **real-time web platform** built with Laravel and Vue.js and a native Android app.

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, PHP, C#
Artificial Intelligence: LangChain, RAG, Prompt Engineering, Vertex AI (Gemini API), AWS Bedrock
Frontend: React, Vue.js, Tailwind CSS
Backend: Laravel, FastAPI, Node.js, .NET
Databases & Caching: MongoDB, MySQL, Redis
DevOps & Infrastructure: AWS, Docker, GitHub Actions (CI/CD), Linux Server Administration (Ubuntu/Debian)
Mobile: Flutter, Android (Native Java/Kotlin)

EDUCATION

Instituto Tecnológico de Aguascalientes M.S. in Artificial Intelligence	Jan 2026 – Present
Instituto Tecnológico de Aguascalientes B.S. in Information and Communication Technologies Engineering	Aug 2014 – Jul 2019
Certifications: Google Data Analytics (2023), AI Engineering – Henry (2026)	
Languages: Spanish (native), English (professional working proficiency)
